

3DSL-NDT Suite 2.2.3 Release Notes

2/17/2017

3DSL-NDT Suite is a Non-Destructive Testing solution that combines 3D Image Acquisition, data analysis, and integrity assessment all into a single package.

Version 2.2.3 includes bug fixes and updates to the Auto Align Window for use with the MT Eagle system. Includes Portfolio 2.2.3, Pipeline Analysis 1.4.1, and Pipeline FFS 1.1.1.

Requirements

3DSL-NDT Suite 2.2.3 requires Windows 7.

Additions

- No additions.

Fixes

- Portfolio will prompt the user to remove scans from the sandbox when approaching the memory limits of the software.

Changes

- Allows Loading Mode in the Auto Align Window without an MT Eagle connected.

Known Issues

- No known issues.
