

3DSL-NDT Suite 2.5.3 Release Notes

8/18/2017

3DSL-NDT Suite is a Non-Destructive Testing solution that combines 3D Image Acquisition, data analysis, and integrity assessment all into a single package.

Version 2.5.3 includes multi language support for Japanese and improvements to 200mm Rhino support.

Includes Portfolio 2.5.3, Pipeline Analysis 1.4.2, and Pipeline FFS 1.1.1.

Requirements

3DSL-NDT Suite 2.5.3 requires Windows 7.

Additions

- New Multi-Language Support: Japanese
 - Portfolio will now display Japanese text if appropriately selected in Windows.
- 200mm Rhino integration with both the Verification Module and the MT Eagle system.

Changes

- None

Fixes

- Corrected the display of the Image List when switching modes in Auto Align Window.

Known Issues

- Tracking in Auto-Align Window is slightly sporadic but does not impede functionality of Auto-Align process
