

3DSL-NDT Suite 2.5.5 Release Notes

01/29/2018

3DSL-NDT Suite is a Non-Destructive Testing solution that combines 3D Image Acquisition, data analysis, and integrity assessment all into a single package.

Version 2.5.5 includes *expanded* target verification process.

Includes Portfolio 2.5.5, Pipeline Analysis 1.4.2, and Pipeline FFS 1.1.1.

Supported Languages: English.

Requirements

3DSL-NDT Suite 2.5.5 requires Windows 7.

Additions

- New Feature that uses a Verification Target Certification file to override Nominal values in Rhino verification process. This gives better results when verifying the Rhino in the field when utilizing the Rhino's paired Verification Target.
